

Find the limit, if it exists, or type N if it does not exist.

$$\lim_{(x,y) \rightarrow (0,0)} \frac{3x^2}{4x^2 + 2y^2} = \boxed{\phantom{0}}$$

Find the limit, if it exists, or type N if it does not exist.

$$\lim_{(x,y) \rightarrow (0,0)} \frac{3x^2}{4x^2 + 2y^2} = \boxed{\text{N}}$$
