

The matrix

$$A = \begin{bmatrix} -2 & -1 & 0 \\ 21 & 7 & -1 \\ k & 0 & 0 \end{bmatrix}$$

has three distinct real eigenvalues if and only if

$$\boxed{} < k < \boxed{}.$$

The matrix

$$A = \begin{bmatrix} -2 & -1 & 0 \\ 21 & 7 & -1 \\ k & 0 & 0 \end{bmatrix}$$

has three distinct real eigenvalues if and only if

$$\boxed{49/27} < k < \boxed{3}.$$
