

Given that $\vec{v}_1 = \begin{bmatrix} -1 \\ 2 \end{bmatrix}$ and $\vec{v}_2 = \begin{bmatrix} 0 \\ -1 \end{bmatrix}$ are eigenvectors of the matrix

$$A = \begin{bmatrix} 0 & 0 \\ -4 & -2 \end{bmatrix},$$

determine the corresponding eigenvalues.

$$\lambda_1 = \boxed{}.$$

$$\lambda_2 = \boxed{}.$$

Given that $\vec{v}_1 = \begin{bmatrix} -1 \\ 2 \end{bmatrix}$ and $\vec{v}_2 = \begin{bmatrix} 0 \\ -1 \end{bmatrix}$ are eigenvectors of the matrix

$$A = \begin{bmatrix} 0 & 0 \\ -4 & -2 \end{bmatrix},$$

determine the corresponding eigenvalues.

$$\lambda_1 = \boxed{0}.$$

$$\lambda_2 = \boxed{-2}.$$
