

Find the following limit. If the limit goes to  $\infty$ , write "inf". If the limit goes to  $-\infty$ , write "-inf".

$$\lim_{x \rightarrow \infty} \left( \sqrt{4x^2 + x} - 2x \right)$$

Find the following limit. If the limit goes to  $\infty$ , write "inf". If the limit goes to  $-\infty$ , write "-inf".

$$\lim_{x \rightarrow \infty} \left( \sqrt{4x^2 + x} - 2x \right)$$
