

Determine whether the integral is divergent or convergent. If it is convergent, evaluate it. If not, state your answer as “divergent”.

$$\int_6^{\infty} \frac{9}{(x+5)^{3/2}} dx$$

Determine whether the integral is divergent or convergent. If it is convergent, evaluate it. If not, state your answer as “divergent”.

$$\int_6^{\infty} \frac{9}{(x+5)^{3/2}} dx$$

$18/\sqrt{11}$
